Notes to the Interim Financial Statements

As at and for three and six months ended June 30, 2013

(unaudited)

---

### 1. REPORTING ENTITY AND GOING CONCERN:

Jasper Mining Corporation (the "Corporation") is incorporated under the laws of the Province of Alberta and is listed on the TSX Venture Exchange. The Corporation is engaged in the business of mineral exploration in Canada. The Corporation's registered office is located at 501, 888 – 4<sup>th</sup> Avenue SW, Calgary, Alberta, T2P 0V2.

To date, the Corporation has not yet determined whether its mineral claims are economically recoverable nor has it found defined reserves and is considered to be in the exploration stage. The Corporation believes that it has established and retains satisfactory title to all of its claims.

These unaudited interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which contemplates the realization of assets and the discharging of liabilities and commitments in the normal course of operations. The ability of the Corporation to continue to operate as a going concern is largely dependent on its ability in the near term to access sufficient new capital to satisfy its current obligations and fund future exploration and development activities. Management plans to meet its capital requirements from available funds, equity financings, sale or farm-out of assets, and cash to be provided from the exercise of share options in the future. Management's assessment of the Corporation is based on its current cash flow forecast and financial model. There are material uncertainties that may cast significant doubt as to whether the Corporation is a going concern because of the following factors:

- a) As at June 30, 2013, the Corporation has a working capital deficiency of \$304,403 and no sources of revenue from its resource assets;
- b) There are significant future capital expenditures required to further explore and develop the Corporation's resource assets; and
- c) The current equity market environment may hamper the Corporation's ability to raise funds for its exploration programs.

Management's plans for addressing the above factors are as follows:

- a) The Corporation will continue to seek appropriate financing initiatives that benefit the Corporation and its shareholders; and
- b) The Corporation will continue to review opportunities to enter into joint venture/farm-out arrangements or the potential sale of existing resource interests.

These financial statements do not give effect to adjustments that would be necessary to the carrying values and classifications of assets and liabilities should the Corporation be unable to continue as a going concern and these adjustments could be material.

Notes to the Interim Financial Statements

As at and for three and six months ended June 30, 2013

(unaudited)

---

### 2. BASIS OF PREPARATION:

These unaudited interim financial statements have been prepared by management in accordance with IAS 34 *Interim Financial Reporting* from International Financial Reporting Standards as issued by the International Accounting Standards Board. These unaudited interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the audited financial statements for Jasper Mining Corporation for the year ended December 31, 2012.

These financial statements were authorized for issue by the Board of Directors on August 25th, 2013.

Operating expenses in the statement of loss are presented as a combination of function and nature in conformity with industry practice. Depletion and depreciation are presented on a separate line by their nature, while operating expenses and net general and administrative expenses are presented on a functional basis. Significant expenses such as salaries, wages and fees and share-based compensation are presented by their nature in the notes to the financial statements.

These unaudited interim financial statements have been presented in Canadian dollars.

### 3. SIGNIFICANT ACCOUNTING POLICIES:

These unaudited interim financial statements have been prepared following the same accounting policies as described in note 3 of the audited financial statements for the year ended December 31, 2012. The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

#### New accounting policies

Effective January 1, 2013, the Company adopted IFRS 10 *Consolidated Financial Statements*, IFRS 11 *Joint Arrangements*, IFRS 12 *Disclosure of Interests in Other Entities*, and IFRS 13 *Fair Value Measurement*. There has been no impact on the financial statements as a result of the adoption of these standards.

### 4. OTHER RECEIVABLES:

(unaudited)

### 11. SHARE-BASED PAYMENTS:

The following is a continuity of stock options for which shares have been reserved:

	Number of options		Weighted- average exercise price
Balance – January 1, 2012	5,560,494	\$	0.24
Expired	(985,494)		(0.34)
Balance – June 30, 2013 and December 31, 2012	4,575,000	\$	0.23

Summary information with respect to options outstanding at June 30, 2013 is provided below:

Exercise price \$	Number outstanding	Weighted average contractual life remaining (years)	Weighted average exercise price \$	Number exercisable
0.15	1,900,000	2.0	0.15	1,900,000
0.26	300,000	0.9	0.26	300,000
0.27	1,200,000	2.7	0.27	1,200,000
0.30	1,175,000	0.2	0.30	1,175,000
	<u>4,575,000</u>	<u>1.65</u>	<u>0.23</u>	<u>4,575,000</u>

During the three and six months ended June 30, 2013 the Corporation's share-based compensation expense was \$nil and \$nil (2012 – \$nil and \$35,472), of which all was recognized in share-based compensation in the statement of loss and comprehensive loss.

### 12. PER SHARE AMOUNTS:

Basic net loss per share is calculated as follows:

	Three months ended June 30		Six months ended June 30	
	2013	2012	2013	2012
Net loss for the period	\$ (24,649)	\$ (21,602)	\$ (38,630)	\$ (102,088)
Weighted average number of shares:				
Issued common shares at beginning of period	73,437,499	72,687,499	73,437,499	72,687,499
Shares issued	–	63,187	–	31,593
Basic weighted average shares	73,437,499	72,750,686	73,437,499	72,719,092
Net loss per share – basic and diluted:	\$ (0.00)	\$ (0.00)	\$ (0.00)	\$ (0.00)

The effect of stock options and warrants is anti-dilutive in loss periods.

### 14. RELATED PARTY TRANSACTIONS:

Except as disclosed elsewhere in these financial statements, the Corporation had the following related party transactions in the normal course of operations and measured at the exchange amount:

- a) Amounts due from related parties consist of amounts due from shareholders, officers and directors of the Corporation and companies controlled or significantly influenced by shareholders and officers of the Corporation. The amounts are non-interest bearing, unsecured and have no fixed terms of repayment.
- b) During the three and six months ended June 30, 2013, \$5,250 and \$10,500 (June 30, 2012 - \$5,250 and \$10,500) was charged for rent by a company owned by the President of the Corporation. Included in trade and other payables at June 30, 2013 is \$10,500 (December 31, 2012 - \$3,675) due to this company.
- c) The Corporation has a receivable of \$777 (December 31, 2012 - \$777) from Jasper Diamonds Inc., 50% owned by the President of the Corporation at period end.
- d) During the three and six months ended June 30, 2013, \$20,000 (December 31, 2012 - \$nil) advance and \$2,462 of expenses was given/paid by the President of the Corporation. This amount was settled by reducing the receivable due from the President of the Corporation. At June 30, 2013, there is \$8,863 (December 31, 2012- (\$12,822)) in accounts payable (receivable) for expense advances from (to) the President of the Corporation.
- e) During the three and six months ended June 30, 2013, \$5,250 and \$10,500 (June 30, 2012 - \$5,250 and \$10,500) was charged by a company owned by the President of the Corporation for administrative services. Included in trade and other payables at June 30, 2013 is \$16,530 (December 31, 2012 - \$16,530) due to this company.

	\$ 24,350	\$ 3,853	\$ 16,739	\$ (48,725)

### 16. COMMITMENTS:

Except as disclosed elsewhere in these financial statements, the Corporation had the following commitments as at June 30, 2013:

- a) Pursuant to flow-through financings completed in November and December 2009, the Corporation was to have incurred \$1,050,000 of qualifying flow-through expenditures by December 2010. Approximately \$1,018,495 of the qualifying expenditures were incurred to December 31, 2012 and an additional \$10,020 has been incurred to June 30, 2013. The Corporation anticipates that it will incur the remaining \$21,485 during the remainder of 2013.
- b) The Corporation had a rental agreement on office premises which expired on May 31, 2013. The agreement has been renewed for a three year term expiring on May 31, 2016 resulting in commitments of \$21,000 per year.

### 17. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT:

The Corporation's financial instruments include cash, other receivables, due from/to related parties, investment, mineral property security deposits, trade and other payables, and long term debt. The carrying values of these financial instruments approximate their fair values due to their relatively short periods to maturity. The Corporation has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments. The Corporation has policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements.

There have been no significant changes in these risks or the approach to managing the risks since disclosed in the Corporation's annual audited financial statements for the year ended December 31, 2012.

### 17. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT: (CONTINUED)

#### a) Credit risk

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Corporation's policy is to ensure that its investments are liquid and not invested in asset-backed commercial paper products.

The Corporation's other receivables relates primarily to Goods and Services Tax input tax credits. Accordingly, the Corporation views credit risk on accounts receivable as minimal and has subsequently collected the outstanding amount.

#### b) Liquidity risk

Liquidity risk is the risk that the Corporation will incur difficulties meeting its financial obligations as they are due. The Corporation's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Corporation's reputation.

The Corporation prepares annual expenditure budgets, which are regularly monitored and updated as considered necessary. To facilitate its expenditure program, the Corporation raises funds through private equity placements. The Corporation's liquidity position has weakened since the beginning of the year due to the cost of ongoing exploration and corporate activities exceeding funds raised during the period. Current market conditions resulting from the global credit crisis have created unfavourable terms for equity financings required for many junior mineral exploration companies, including the Corporation. As a result, the Corporation is currently evaluating alternatives to raise additional capital to improve liquidity.

As at June 30, 2013, the Corporation's financial liabilities were comprised of trade and other payables which have a maturity of less than one year and long term debt.

#### c) Market risk

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

##### i) Currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Corporation is considered to be in the exploration stage and has not yet developed commercial mineral interests, the underlying market prices in Canada for minerals are impacted by changes in the exchange rate between the Canadian and United States dollar. As all of the Corporation's transactions are denominated in Canadian dollars, the Corporation is not exposed to foreign currency exchange risk at this time.

### 17. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT: (CONTINUED)

#### c) Market risk (continued)

##### ii) Commodity price risk

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above. As the Corporation has not yet developed commercial mineral interests, it is not exposed to commodity price risk at this time.

##### iii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Corporation is exposed to interest rate risk primarily through its variable interest rate on its cash and mineral property security term deposits. For the three and six months ended June 30, 2013, if interest rates had been 1% higher with all other variables held constant, loss for the period would have been \$74 and \$142 lower (June 30, 2012 – \$65 and \$130) due to increased interest income. An equal and opposite impact would have occurred had interest rates been lower by the same amounts.

The Corporation did not have any interest rate contracts outstanding at June 30, 2013 or December 31, 2012.

### 18. CAPITAL MANAGEMENT:

The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue as a going concern and to maintain a flexible capital structure which will allow it to pursue the development of its mineral properties. Therefore, the Corporation monitors the level of risk incurred in its mineral property expenditures relative to its capital structure.

The Corporation considers its capital structure to include its working capital deficit of \$304,403 (December 31, 2012 – deficit of \$261,674) and shareholders' equity of \$89,330 (December 31, 2012 – \$127,960). The Corporation monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets.

To maintain or adjust the capital structure, the Corporation may issue new equity if available on favourable terms, option its mineral properties for cash and/or expenditure commitments from optionees, enter into joint venture arrangements, or dispose of mineral properties.

The Corporation's investment policy is to hold cash in interest bearing bank accounts and highly liquid short-term interest bearing investments with maturities of one year or less which can be liquidated at any time without penalties.

The Corporation is not subject to externally imposed capital requirements. There has been no change in the Corporation's approach to capital management during the three and six months ended June 30, 2013. The Corporation has not paid or declared any dividends since the date of incorporation, nor are any contemplated in the foreseeable future.

### **19. SUBSEQUENT EVENTS:**

In July 2013, the Corporation completed a private placement for a total of 728,574 units at \$0.07 per unit for gross proceeds of \$51,000. Each unit consisted of one common share and one half common share purchase warrant. Each whole warrant entitles the holder to purchase one common share at an exercise price of \$0.12 per share for up to two years from the closing date. Some of these units were purchased by a company whose majority owner is the president of the Corporation and the rest was purchased by a new director of the Corporation.

In addition, in July 2013, the Corporation granted 1,500,000 stock options at \$0.10 per share and expiring on July 4, 2018.
