1. REPORTING ENTITY AND GOING CONCERN:

Jasper Mining Corporation (the "Corporation") is incorporated under the laws of the Province of Alberta and is listed on the TSX Venture Exchange. The Corporation is engaged in the business of mineral exploration in Canada. The Corporation's registered office is located at 501, 888 – 4th Avenue SW, Calgary, Alberta, T2P 0V2.

To date, the Corporation has not yet determined whether its mineral claims are economically recoverable nor has it found defined reserves and it is considered to be in the exploration stage. The Corporation believes that it has established and retains satisfactory title to all of its claims.

Effective July 16, 2014, Jasper effected an 8 to 1 consolidation of its equity instruments (Note 7).

These unaudited financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which contemplates the realization of assets and the discharging of liabilities and commitments in the normal course of operations. The ability of the Corporation to continue to operate as a going concern is largely dependent on its ability in the near term to access sufficient new capital to satisfy its current obligations and fund future exploration and development activities. Management plans to meet its capital requirements from available funds, equity financings, sale or farm-out of assets, and cash to be provided from the exercise of options in the future. Management's assessment of the Corporation is based on its current cash flow forecast and financial model. There are material uncertainties that may cast significant doubt as to whether the Corporation is a going concern because of the following factors:

- a) As at September 30, 2015, the Corporation has a working capital deficiency of \$356,115 and no sources of revenue from its resource assets;
- b) There are significant future capital expenditures required to further explore and develop the Corporation's resource assets; and
- c) The current equity market environment may hamper the Corporation's ability to raise funds for its exploration programs.

Management's plans for addressing the above factors are as follows:

- a) The Corporation will continue to seek appropriate financing initiatives that benefit the Corporation and its shareholders.
- b) The Corporation will continue to review opportunities to enter into joint venture or farm-out arrangements or the potential sale of existing resource interests.
- c) The Corporation is looking to acquire some producing oil and gas properties.

These financial statements do not give effect to adjustments that would be necessary to the carrying values and classifications of assets and liabilities should the Corporation be unable to continue as a going concern and these adjustments could be material.

2. BASIS OF PREPARATION:

These unaudited interim financial statements have been prepared by management in accordance with IAS 34 Interim Financial Reporting from International Financial Reporting Standards as issued by the International Accounting Standards Board. These unaudited interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the audited financial statements for Jasper Mining Corporation for the year ended December 31, 2014.

These financial statements were authorized for issue by the Board of Directors on November 25th, 2015.

Depreciation are presented on a separate line by their nature, while general and administrative expenses are presented on a functional basis. Significant expenses such as salaries, wages and fees and share-based compensation are presented by their nature in the notes to the financial statements.

These unaudited interim financial statements have been presented in Canadian dollars.

3. SIGNIFICANT ACCOUNTING POLICIES:

- a) In August 2015, the Corporation completed a private placement to a non-arm's length investor for a total of 500,000 units at \$0.05 per unit for gross proceeds of \$25,000. Each unit consisted of one common share and one common share purchase warrant. Each whole warrant entitles the holder to purchase one common share at an exercise price of \$0.10 per share for up to two years from the closing date. At the time of the private placement, the fair value of the warrants was estimated to be \$11,838 with the \$13,162 balance of proceeds ascribed to common shares. The warrants were valued using the Black Scholes pricing model with the following significant assumptions:

Share price	\$0.04
Exercise price	\$0.10
Risk-free interest rate	0.40%
Expected volatility	155%
Expected life	2 years

14. COMMITMENTS:

Except as disclosed elsewhere in these financial statements, the Corporation had a rental commitment as at September 30, 2015 of \$21,000 per year on office premises which expires on May 31, 2016 leaving \$14,000 payable till the end of the lease.

15. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT:

The Corporation's financial instruments include cash, other receivables, due to related parties, investment, mineral property security deposits, and trade and other payables. The carrying values of these financial instruments approximate their fair values due to their relatively short periods to maturity. The Corporation has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments. The Corporation has policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements.

a) Credit risk

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Corporation's policy is to ensure that its investments are liquid.

The Corporation's other receivables relates primarily to Goods and Services Tax input tax credits. Accordingly, the Corporation views credit risk on accounts receivable as minimal and has subsequently collected the outstanding amount.

b) Liquidity risk

Liquidity risk is the risk that the Corporation will incur difficulties meeting its financial obligations as they are due. The Corporation's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Corporation's reputation.

The Corporation prepares annual expenditure budgets, which are regularly monitored and updated as considered necessary. To facilitate its expenditure program, the Corporation raises funds through private equity placements. The Corporation's liquidity position has weakened since the beginning of the year due to the cost of ongoing exploration and corporate activities exceeding funds raised during the period. Current market conditions resulting from the global credit crisis have created unfavourable terms for equity financings required for junior mineral exploration companies, including the Corporation. As a result, the Corporation is currently evaluating alternatives to raise additional capital to improve liquidity.

As at September 30, 2015, the Corporation's financial liabilities were comprised of trade and other payables and due to related parties which have a maturity of less than one year.

15. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT: (CONTINUED)

c) Market risk

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

i) Currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Corporation is considered to be in the exploration stage and has not yet developed commercial mineral interests, the underlying market prices in Canada for minerals are impacted by changes in the exchange rate between the Canadian and United States dollar. As all of the Corporation's transactions are denominated in Canadian dollars, the Corporation is not exposed to foreign currency exchange risk at this time.

ii) Commodity price risk

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above. As the Corporation has not yet developed commercial mineral interests, it is not exposed to commodity price risk at this time.

iii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Corporation is exposed to interest rate risk primarily through its variable interest rate on its cash and mineral property security term deposits. For the three and nine months ended September 30, 2015 and 2014, if interest rates had been 1% higher with all other variables held constant, the change in the loss for the periods would have been insignificant.

The Corporation did not have any interest rate contracts outstanding at September 30, 2015 or December 31, 2014.

16. CAPITAL MANAGEMENT:

The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue as a going concern and to maintain a flexible capital structure which will allow it to pursue the development of its mineral properties. Therefore, the Corporation monitors the level of risk incurred in its mineral property expenditures relative to its capital structure.

The Corporation considers its capital structure to include its working capital deficit of \$356,115 (December 31, 2014 – deficit of \$310,920) and shareholders' equity of \$18,748 (December 31, 2014 – \$61,161). The Corporation monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets.

To maintain or adjust the capital structure, the Corporation may issue new equity if available on favourable terms, option its mineral properties for cash and/or expenditure commitments from optionees, enter into joint venture arrangements, or dispose of mineral properties.

16. CAPITAL MANAGEMENT: (CONTINUED)

The Corporation's investment policy is to hold cash in interest bearing bank accounts and highly liquid short-term interest bearing investments with maturities of one year or less which can be liquidated at any time without penalties.

The Corporation is not subject to externally imposed capital requirements. There has been no change in the Corporation's approach to capital management during the three and nine months ended September 30, 2015. The Corporation has not paid or declared any dividends since the date of incorporation, nor are any contemplated in the foreseeable future.
