A British Columbia numbered company has agreed to use its own resources to develop a comprehensive study to delineate the lead, zinc, silver and gold potential on Jasper’s Ruth Vermont /Vowell Creek properties.

The Ruth Vermont/Vowell Creek properties consist of approximately 10,283 acres located 30 km southwest of Golden, BC. These properties have been previously drilled by Jasper with encouraging lead, zinc, silver and gold intercepts, all of which have been announced in earlier News Releases.
